

FREE TRAINING!

The Wyoming Association of Sheriffs and Chiefs of Police is sponsoring 8 hours of POST certified training on each of the following topics:

Alcohol Facilitated Sexual Assault Investigations

Alcohol, a Central Nervous System Depressant, has been traditionally used by subjects to facilitate sexual assaults. This presentation will assist the patrol officer/detective/investigator with the investigation of alcohol/drug facilitated sexual assaults, understand the make-up/motivation of the offender and recognize the different drugs used and signs/symptoms associated with those drugs.

Policing the Cyber World for Underage Alcohol Issues

Today social networks are public places for young people to share information outside of the traditional communications systems and experimenting with sites to interact and connect with one another. The technology on line leaves a digital footprint and can be used by law enforcement and community groups to aid them in their investigations. Key points covered in the training include fundamentals of the internet, how social networking websites function, how to access these websites for the purpose of gathering information related to underage alcohol problems and what can be done with the information gleaned from the searches, and gathering evidence, issues of admissibility and case preparation related to prosecutions initiated through cyber world law enforcement operations. These investigative techniques can be used to further any type of investigation.
